COMPANY PROFILE

CompeGPS Team develops software for digital map viewing and GPS navigation since 2001, creating applications for outdoor trip management (hiking, mountain biking, 4X4, paragliding, hang gliding, etc.) for PC, PDA and mobile phone. Programs are supplemented by a comprehensive catalogue of topographic maps from around the world.

We recently developed **TwoNav**, which adds all functions of the typical road navigators (Tele Atlas maps) to the traditional 'Off-road' capabilities. The product is marketed as software (Pocket PC, mobile phone, PC/UMPC/TabletPC) and as high end hardware (TwoNav Aventura).

TwoNav is also available as OEM software to be distributed jointly with any kind of PND (Portable Navigation Device).

PRODUCTS

TwoNav Aventura (GPS)

TwoNav (PC, PDA & MOBILE)

CompeGPS Land (PC y PDA)

CompeGPS Air (PC y PDA)

Topographic maps

European Urban Maps
