

MIER COMUNICACIONES PRESENTS ITS INNOVATIONS AT IBC'07

ONCE AGAIN THIS YEAR, MIER COMUNICACIONES PRESENTS ITS NEW PRODUCTS AND SOLUTIONS AT IBC SHOW.

Among the most important innovations exhibited, the most outstanding is the new range of low power Digital TV & Mobile TV transmitters, re-transmitters, transposers, and repeaters (including our internationally patented Echo Canceller system for On-channel Repeaters) specifically designed to meet the needs for massive coverage extension in Digital Switchover projects.

MIER COMUNICACIONES also shows its Intelligent High Gain On-channel repeater, including the third generation of the Echo Canceller system, available up to 100Wrms in only 4U-high. This equipment is also available as transmitter (with a built-in DVB-T/H modulator) and transposer.

Outside the television field, MIER COMUNICACIONES also introduces its On-channel repeater with Echo Canceller system for DAB and T-DMB, a new tool for coverage extension of Digital Radio and Mobile TV networks, available up to 50Wrms in only 4U-high.

Additionally MIER COMUNICACIONES introduces its new range of Mobile telephony repeaters, a GSM-EDGE Universal coverage expansion cost-effective solution, providing improved flexibility (1, 2 or 4 carriers versions are available).

This industry-leading company has focused its efforts on the development of solutions in order to extend Digital TV and Mobile TV coverage. MIER COMUNICACIONES has actively participated in the development of DVB-T and DVB-H technologies from their beginnings, and now is devoting its efforts to the development of solutions to facilitate the deployment of Digital TV and mobile TV networks.

The On-channel Repeater with Echo Canceller is a key element for a massive extension of coverage without the need to install costly transmitters. MIER COMUNICACIONES is the first manufacturer to supply this kind of equipment, with an internationally patented technology, being in operation in more than 20 countries worldwide.

Meet MIER COMUNICACIONES at the IBC exhibition in Amsterdam (7 - 11th Sept.):

Hall 8, Booth 8.521
RAI International Exhibition & Congress Centre
